

HYPATIA PROJECT

Enterprise Solutions for Government

Hypatia is a trusted IT solutions and emerging technology provider for the public sector. As a channel partner to best-of-breed vendors, we provide mission support, engineering excellence and highly competitive prices through prime contract vehicles. Please contact 571-346-7612 for consultation and sales.

Enterprise Technologies

VMware is the global leader in virtualization and cloud computing solutions from desktop to datacenter. All 15 cabinet level agencies, military services, numerous DoD agencies, and many other federal agencies rely on VMware to avoid IT infrastructure costs, ensure continuity of operations, and provide secure endpoints.

Dell EMC is a leader in enabling government agencies to transform their operations and deliver IT as a service, providing servers, converged infrastructure, data storage and protection, networking, cloud and high performance computing solutions. We proudly support the Dell EMC Women's Partner Network.

ServiceNow automates workflows for every department in the enterprise. Public sector solutions speed and automate the delivery of modern citizen services while driving the cost of government down on a FedRAMP-certified cloud platform. Consolidate legacy tools to a single system to deliver IT support.

Virtustream Federal Cloud provides industry-leading SLAs with true consumption-based pricing model that supports capacity on demand. Virtustream provides the U.S. Department of Defense (DoD) and approved mission partners with on-premises private cloud services to support data classified up through Impact Level 5 (IL5) and DoD production workloads.

Google Cloud enables government agencies to move fast and innovate. By providing the features and controls agencies need to be productive, secure, and efficient, Google is enabling employees to work better together, from anywhere and with tools they can trust.

Palo Alto Networks is the next-generation security company maintaining trust in the digital age by helping organizations prevent cyber breaches. Palo Alto Network's security platform safely enables applications, users and content, empowering government agencies to securely move their missions forward.

Secureworks provides managed cybersecurity services, enriching enterprise defenses with intelligence from the 250-billion cyber events observed each day across 4,400 clients in more than 55 countries. By investing in supervised machine learning and analytics, as well as the brightest minds in the industry, Secureworks automates and accelerates event detection, correlation, and contextualization.

NVIDIA provides AI and deep learning solutions across industries with GPU acceleration. NVIDIA redefined modern computer graphics, revolutionized parallel computing and now delivers parallel processing everywhere you need it— from data centers, to the world's fastest supercomputers, to internet of connected drones, robots and devices.

As the standard for Linux in governments, Red Hat's cloud, virtualization, storage and platform solutions bring freedom, collaboration, and the power of open source to all government agencies.

HYPATIA PROJECT

FireEye provides real-time threat protection without the use of signatures to protect an organization across the primary threat vectors and across the different stages of an attack life cycle. The core of the FireEye platform is a virtual execution engine, complemented by dynamic threat intelligence, to identify and block cyber attacks.

Salesforce is the enterprise cloud computing leader dedicated to helping companies and government agencies transform into connected organizations through social and mobile technologies. Salesforce's list of over 150,000 customers span nearly every industry worldwide.

Adobe revolutionizes how agencies engage with ideas and information, transforming and extending government services to provide a richer, more productive, and trusted experience with constituents, personnel, and the military. Adobe helps government deliver information to the edge

Boomi

Boomi helps business connect all your applications and data sources across your hybrid IT landscape to unlock data silos and achieve pervasive integration.
